Comparison of Off Site vs. On Site Trainee Perceptions

- **Overall course rating**
- **Appropriate for my level of learning**
- **Scenarios were realistic**
- **Scenarios were challenging**
- **Scenarios were appropriate for my level of education**
- **Improved my confidence**
- **Discussion of my performance was helpful**
- **Debriefing was professional, non-personally threatening**

**Likert Scale Data**

- **Off Site**
- **On Site**

* p < 0.05

**METHODS**

We compare various parameters of trainee’s perceptions of simulation based programs that were conducted in off-site locations to that of a large university based simulation center.

The significance of the differences was determined by finding the median response along with the interquartile range and then calculating a p-value by using the Wilcoxon rank-sum test for each survey item.

**RESULTS**

- **361 Respondents**
- **281 (78%) On-site at WISER**
- **80 (22%) Off-site**
