This presentation will review 10 Topical, Original, and Practical articles from the 2010 indexed and peer-reviewed simulation literature. A brief synopsis of each article and its application to patient simulation for nursing and healthcare educators will be discussed. Observations about the breadth and future of simulation research and the simulation literature will also be addressed. The reference citations for the articles to be discussed are listed below.

- Gantt LT. Using the Clark Simulation Evaluation Rubric with Associate Degree and Baccalaureate Nursing Students. *Nursing Education Perspectives*. 2010;31(2):101-105.

- Swygert KA, Balog KP, Jobe A. The Impact of Repeat Information on Examinee Performance for a Large-Scale Standardized-Patient Examination. *Academic Medicine* 2010;85:1506-1510.

Additional reference will be made to the following articles in the course of the presentation discussion.
